

Docket No. - 98-045N.

FSLIS REC'D BY ROOM  
99 OCT 22 1999  
9-22-99

Food safety hazards

First, & foremost, need to be addressed at the source, with mandatory safeguards at the animal production stage. problems include — over crowding animals, subjecting them to stressful procedures, & conditions, feeding them chicken litter, & feces, rendering diseased animals into animal feed, excessive use of antibiotics, & other drugs, & inhumane, & unhygienic transport & slaughter! whatever goes into the animal, can also go into humans! Regulatory authority at the production stage, must be expanded, with adequate funding actively sought! Thank-you!

Sincerely, ms Jan van Dyne.
